

Shuliak Luibov

Full-stack developer

Summary

A well-motivated junior fullstack developer is looking for a company where he can create projects that are useful for people. I am interested in all the different components of web development. I want to become a full-stack developer, and be able to fully implement the project, from the production of architecture, to the deployment to the Internet.

Work Experience

Frontend-developer

Devonics. | March - August 2022

- HTML + CSS responsive layout, can even say - i master of it :)
- I am an only React developer in team, so I build frontend for site with two factor authentication with such features:
- getting and rendering an svg code(if exists);
- adding user telegram (for notifications), api token(not for authorization, its an service feature), limit for notifications;
- issue card;
- get list of cards;
- get list of cards filtered by tags;
- block card;
- add limit to card;
- add tag, comment to card;
- reports for blocked cards, downloading in csv format.
